

Other Conditions Applying to the 2011
Paid Personal Use Firewood Permit
Williams Ranger District, Kaibab National Forest

For all firewood

1. **Following the publication of the Motor Vehicle Use Map (MVUM), motorized travel off the identified open road system is prohibited (unless within designated fuelwood areas). Permittee is responsible for complying with travel management policies.**
2. **After JUNE 15, 2011 the permittee must contact the Williams Ranger District, 742 South Clover Road, Williams AZ, (928) 635-5600, to obtain the current MVUM and information regarding motorized vehicle use on the district**
3. Trees with signs or tags may not be removed.
4. Any standing, dead tree within 500 feet of a reservoir or stock tank may not be removed.
5. Any standing, dead tree within 75 feet of a paved public road may not be removed.
6. This permit is not transferable. You must be present when the wood is being cut unless you have authorized someone to cut your wood for you. This authorization must be in writing on the permit and the Forest Service must be informed.
7. To prevent soil and vegetation damage, do not drive off existing roads when soils are wet and when damage may occur (off road travel only permitted in designated areas after June 15).
8. Your power saw must be equipped with a .023 stainless steel spark arrestor screen.
9. **The removal record on your permit must be filled out and fuelwood tags attached prior to transporting the wood from the location where it was cut. See instructions for use of fuelwood tags.**
10. Read the conditions of your permit carefully. If you have questions, please call any Forest Service office for assistance prior to gathering firewood. Failure to adhere to any of these requirements may result in loss of your wood and/or permit, and a fine of up to \$5,000.
11. Follow all rules on road use and off road travel.
12. Within this area firewood cannot be removed from administrative sites and developed recreation sites including developed campgrounds, picnic areas, trailheads and interpretive sites.

Commercial timber sale areas and other contract areas are also excluded from cutting under this permit.

13. For all species stump height for standing trees cut is **6** (six) inches or less

For Dead and Down Wood Only

14. Dead and **down** (on the ground) wood of any species may be removed. The removal of **standing**, dead trees is limited by species and size according to the following rules: (Note that diameters are measured at 4 ½ feet above the ground.)

Ponderosa Pine – Only dead, standing trees less than 12 inches in diameter (38 inches in circumference) or less than 15 feet in height may be removed.

Pinyon Pine – Only dead, standing trees less than 10 inches in diameter (32 inches in circumference) or less than 12 feet in height may be removed.

Gambel Oak – Only dead, standing trees less than 8 inches in diameter (25 inches in circumference) or less than 12 feet in height may be removed. In addition, **dead, standing oak may only be removed between June 1 and September 30.**

Juniper – Only dead, standing trees less than 20 inches in diameter (68½ inches in circumference) or less than 15 feet in height may be removed.

Aspen – Only dead, standing trees less than 12 inches in diameter (38 inches in circumference) or less than 12 feet in height may be removed. In addition, **dead, standing aspen may only be removed between June 1 and September 30.**

For all species, dead limbs may not be removed from live trees. Trees must be completely dead with no live foliage.

For Green Juniper Only

15. There are diameter limits to the trees which may be removed, see attached map for the size limit for the area you are cutting in: (Note that diameters are measured at 4½ feet above the ground).
16. Green juniper can be cut only within designated units (see attached map).
